Experience

OpenText

Oct 2023 – March 2024

Engineering Intern

Bengaluru, Karnataka

- Contributed to the development and testing of rules for Active Invoice Compliance (AIC) on the Business Validation Services (BVS) engine during the internship at OpenText.
- Focused on validating invoices for both domestic and international transactions, ensuring accuracy and compliance for various businesses.
- Implemented automation on the whole process to significantly increase efficiency, reducing a task taking two weeks to just two days.

Education

Lovely Professional University

August 2020 - May 2024

Bachelor of Technology in Computer Science (CGPA: 8.34)

Phagwara, Punjab

Atomic Energy Central School No. 4

April 2018 - May 2020

Higher Secondary - Physics, Chemistry, Maths with Computer Science (Percentage: 80.6%)

Rawatbhata, Rajasthan

Technical Skills

Languages: C++, Java, JavaScript

Technologies: HTML5, CSS3, React, Express.js, Node.js, EJS, Git, Github, Postman, RESTful APIs, Playwright

Data Management: MySQL, MySQL Workbench, MongoDB, Studio3t

Others: Data Structures and Algorithms, Object-Oriented Programming, Computer Networks, Operating Systems, DBMS, Scrum, Jira

Projects

Secrets | Node.js, Express.js, MongoDB

- Designed and developed a robust application tailored for securely managing user secrets.
- Utilized MongoDB and Atlas to establish a remote data storage solution, ensuring seamless access to stored secrets from anywhere.
- Implemented Google OAuth for streamlined and secure user authentication, enhancing the overall user experience and bolstering security measures.

Keeper | React, Node.js, MongoDB

- Engineered a user-friendly web-based application for note-taking purposes. Leveraged React to craft a dynamic and responsive front-end interface, providing an intuitive user experience.
- Utilized MongoDB as the back-end database solution, seamlessly storing and managing data for efficient retrieval and manipulation.
- Integrated Studio3T for streamlined database management, ensuring optimal performance and data organization.

Certifications and Accomplishments

Data Structures and Algorithms - Self Paced | Mr. Sandeep Jain, GeeksforGeeks

- Learnt various Data Structures and Algorithms and started using them in Problem solving on platforms like Leetcode, GeekforGeeks, Hackerrank.
- Solved 250+ coding questions across multiple platforms, gaining optimization skills and expertise in analyzing time and space complexity.

The Complete 2022 Web Development Bootcamp | Angela Yu, Udemy

- Learnt essential web development languages and technologies such as HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB, and much more involved in web development.
- Had hands-on experience building real-world projects and applications, enhancing practical coding skills on industry standards and problem-solving abilities.

Accomplishments

- 5 Stars rating in Problem-Solving in C++ and Java on **HackerRank**.
- Google Cloud - 30 Days Challenge
